Experience

[Klarna](#)

Engineer, Klarna Card Management   Berlin, Germany | Oct 2021 - Present

- Developed and maintained the wallet providers features (Apple - Google - Samsung) Pay.
- Worked alongside designers and product managers to make sure the user experience is very smooth and easy for the customer group we target.

Tech stack: Javascript, Typescript, ReactJS, NodeJS, Javascript, Typescript, AWS, Microservices.

[Experience-OS GmbH](#)

Software Engineer, EXOS App Core   Berlin, Germany | Jun 2020 - Sept 2021

- Worked on multiple applications that served the project (Backend with Laravel, Frontend with ReactJS, Mobile with React Native).
- Participating in design and architecture reviews that was then translated into features I built into the project.

[Excelcodes](#)

Engineer, Full Stack team   Cairo, Egypt | March 2018 - May 2020

- Working as a software developer in agency style to build and deploy apps/websites to our clients, I was involved in the whole project's lifecycle from architecture to design to developing to deploying to customer feedback.

Projects

- ### [Snapbooks](#)

  I worked for Snapbooks startup as a freelance senior software engineer for over 3 years building and maintaining their products including a [mobile](#) application, [website](#) and a [landing](#) page.

  Tech stack: Typescript, ReactJS, ReactNative, AWS, CICD, C#, SAP, SAP b1.

- ### [Checkbee](#)

  I built Checkbee as a solo engineer from backend to frontend to deployment. Now this project has a [mobile](#) app, a [dashboard](#) and a nicely built backend.

  Tech stack: Typescript, ReactJS, ReactNative, NestJS, Postgresql, AWS, Lambda, CICD.

Education

- **Ain Shams University**

  Computer Science   Cairo, Egypt | 2014 - 2018
  GPA: 3.4
